

Cloud **vs** On-Premise

Why the Cloud Wins

When it comes to choosing a new solution for your airport, the choice between a cloud-based or on-premise solution can have a major impact on your business.
Here's why forward-thinking airports and operators are choosing cloud.

Cloud Platform

Flexible, Scalable, and Effortless

On-Premise

High Costs, High Risk, Low Agility

Scales effortlessly

Grows with your business - no pricey hardware upgrades or infrastructure investment.

vs

Limited growth

Scaling is expensive and difficult, requiring large upfront investments.

Access from anywhere

Manage your operations securely from any device, wherever you are.

vs

High maintenance

Ongoing costs are significant and require a dedicated IT team to manage.

Quick setup

Launch faster with our pre-built, tested platform. No complex deployments.

vs

Slow updates

Complex, time-consuming, and disruptive updates keep you behind the curve.

Effortless operations

Fewer people, less time, and minimal IT expertise required to run smoothly.

vs

Limited access

Access is typically confined to your office, limiting flexibility.

Always on

Built-in redundancy keeps your business running without interruption.

vs

High initial investment

Requires substantial upfront costs for infrastructure and software licenses.

Seamless upgrades

Updates happen automatically with minimal disruption - no downtime or hassle.

vs

Security risks

On-site infrastructure increases risk of security breaches.

Lower cost

Only pay for what you use. No hefty upfront costs, making budgeting predictable.

vs

Vendor lock-in

Switching systems can be difficult and costly once you're locked in.

Connect anytime, anywhere

Secure, simple access - no complex IT configurations or limitations.

vs

Risk of becoming obsolete

Hardware and software quickly become outdated, impacting performance.

First-class support

Enjoy hands-on assistance during your trial and beyond for a smooth transition.

The Verdict: Cloud is the Future

Choosing a cloud-based solution means you're choosing agility, simplicity, and peace of mind. With a lower total cost of ownership, stronger security, and future-proof scalability, it's the smart choice for modern airport operations.

Let's talk about how Cloud solutions can power your growth - now and into the future.
